Intentional Selling: Revealing the Secret Behind Joyful Sales

By Lynn Whitbeck

Founder and CEO of Petite2Queen

ABWCI's State President, Washington (USA)

Sales is a gift. You may struggle with this statement if you ever feel uncomfortable asking for the sale. Or even believing sales is sleazy and slimy. However, you will discover that sales is a gift when you follow these three powerful principles.

Principle 1 – Client Thinking

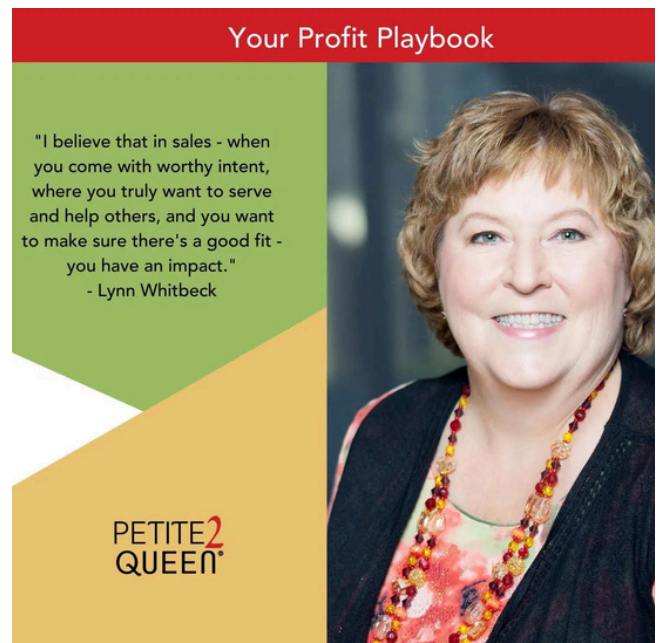

Understanding how your client thinks is crucial to attract, connect, and capture your ideal clients. What do they want, need, or lack? What problem does your product or service solve? What solution does it offer? Why does your product or service matter to them – your ideal client? What's in it for them? So they can achieve what goal, initiative, or dream?

Principle 2 – CROWN Methodology

To grow, scale, and serve more clients, you must have a consistent and reliable sales framework. The CROWN methodology provides the framework you need to leverage your own unique style and authentic approach to drive inbound leads. The CROWN methodology is: C = Client Thinking; R = Repeatable and Scalable; O = Originally Authentic; W = Worthy Intent; N = Nurture and Flourish.

Principle 3 – Worthy Intent

The real purpose of sales is to help, serve, and deliver value to your clients. It's a trusted partnership. Worthy intent is your genuine desire to create a lasting impact for your clients. You care about your client's outcomes, celebrate their wins, and are an extended member of their team. Sales is joyful when your mindset, mission, and matchless-self come together. The "missing" puzzle piece falls into place. You have a blueprint to close more sales with ease. And you joyfully help and serve your clients, creating a lasting impact.
